# ALEMITE

*High pressure lubricating system*

YOUR car is piling up a big repair bill every mile you drive unless you give it the benefit of proper lubrication. The proper way to lubricate is the Alemite way. It does away with guess work and dirty work. It puts lubricant into the bearings under 500-pounds pressure. Install Alemite on your car, use the compressor every 500 miles and see the difference in your upkeep costs.

The compressor hose is quickly and positively attached by the Alemite Bayonet Lock, an exclusive patent

Ask your dealer about Alemite and Alemite Lubricant.

For best results use Alemite Lubricant with the Alemite System. It is pure solidified oil

**A**LEMITE is standard equipment on over 300 different makes of motor vehicles.

There is an Alemite Distributor in every large city in the United States under the name of the Alemite Lubricator Co. of—

No matter what make of car, truck or tractor you own there are Alemite fittings made to replace your ineffectual grease cups.

**Alemite** is a positive, efficient, clean and easy system of chassis lubrication.
